George Campbell Library

Study materials for the new candidates of IMU, GP, BSc. NS(MU) has been procured from various books vendors in time. Library has also in process of updating its IMO Model courses of its courses for future inspection. Past question banks and the detailed teaching syllabus of DNS has been added in all library computers for better preparation of their examination.

One new teaching video procured from Videotel in free with title: Resilience – Positivity, Perspective and Confidence (Code no. 7800)

This video implies the problems arise on board ships every day and seafarers are confronted with challenges that can be difficult to overcome. Without adequate resilience, seafarers are unable to bounce back from setbacks and fail to ensure the continued safe operation of the vessel.

Marine Museum

In the month of July, 2019, a group of 62 students from Presentation Convent School, Nerul visited the Marine Museum. They enjoyed their visit to the campus.

PRE-SEA CONTRIBUTION

BUILDING A BETTER TOMORROW

Tomorrow is an uncertainty shrouded in a cloud of hope and desire. People often say, 'Live in the present' and don't usually think about what the future has in store for us.

The world we live in is a gift given to us by our parents and this has been prevalent for generations. It is now our duty to preserve this inherited haven for future generations to come. Sadly, we have corrupted our purpose. We are using and exploiting our world and the resources it provides for our selfish needs. Exhaustion of resources, deforestation, extinction of species, global warming, human conflict etc. has caused irreparable damage.

Polar ice caps are melting, our ground water system is getting polluted and declining, global climatic changes and epidemics are the end products of our selfish deeds. The generations to come will have no option but to breathe in polluted, toxic air and drink contaminated water if we don't put a stop to this.

Mother Nature has raised us and protected us and now it is our responsibility to return the favour. In this era of technological advancement, nothing is impossible. It is never too late to start but the only thing required is the people's willingness and cooperation towards the cause. Making wise decisions like choosing public transport over private transport could prevent depletion of fossil fuels and different forms of pollution. Using wind and hydro-energy as a source of power consumption would be a major advantage for conservation of resources. Incorporating non-conventional sources of energy like solar power can help to build a better tomorrow.

As the elite species inhabiting this little blue marble and also as children of the world, it is our duty and responsibility to do whatever is possible within our capacity, to save and improve the conditions of our planet and pass on a clean, healthy environment to the next generation.

A better tomorrow should not be an objective to achieve but a duty to fulfil.

SAHIL KOTIAN

F. Y. BSc (NS)- BATCH 15
